Graduate Member Institution of Civil Engineers (GMICE)

Experience 2006 to present

Evaluation of contract claims

Richard is responsible for assessing and defending various claims brought by contractors against Eptisa, to assist in the mediation process. A claim relating to the Mersey Gateway Project was successfully resolved at mediation and a claim relating to the N25 New Ross Bypass tender is ongoing.

Mersey Gateway Project

Deputy Project Manager Landside Structures. Project manager for Eptisa whose design responsibilities covered all retaining walls, drainage for the entire project including the Main Bridge, geotechnical design and sub-structure design for the Astmoor & Bridgewater Viaduct. Richard was responsible for the supervision of production and submission of drawings and reports, including quality control. He attended weekly design coordination meetings as well as monthly DJV Board meetings.

N25 New Ross Bypass

Project Manager CAT III check including Barrow Crossing. Richard was responsible for overseeing the independent checking (category 3) and acceptance of structural drawings and geotechnical reports as well as attending client coordination meetings.

New Europe Bridge

Management of production of Working Drawings and also Design Site Representative for the New Europe Bridge (Vidin–Calafat Bridge, Bulgaria). Richard was responsible for developing the design general arrangement drawings for the entire project into working drawings. These included the river crossing and approach as well as the railway bridge and the drainage design for both structures. He was also the Design Site Representative and attended monthly site design coordination meetings between designers, client and checking engineers.
